Respected Sir/ Madam,

With reference to above cited subject, I am glad to convey you that a selection committee meeting for our G.H.Raisonni Institute of Engineering & Technology, Wagholi, Pune is scheduled on 18<sup>th</sup> February 2013 at 10:00 am in our RGI Wagholi, Pune campus. I hereby invite you as a subject expert for Computer Engineering & Information Technology.

Our faculty member will contact you to fix up your travel plan. In case you need any other information, please contact me on my mobile. (No: 9657724102)

Thanking You.

Yours faithfully

Subject: Organizing Industrial Visit of BEIT students to DAKC Mumbai.

Respected Sir,

The Department of Information Technology is arranging Industrial Visit of BE IT students to Dhirubhai Ambani Knowledge City, Mumbai on 30<sup>th</sup> August 2013. A DAKC is a campus/technology park located on the Thane-Belapur Road, Koparkhairane in Navi Mumbai, India. The campus is partially Wi-Fi enabled with two HDFC banks and one ICIC bank ATM located therein. The students of BEIT study wireless network, Mobile Computing as part of curriculum, so visiting DAKC will be very helpful for the student. Please allow us for proceeding further and arranging the Industrial Visit.

Thanking you,

*Dakhale*  
8/8/13  
Yours Sincerely,

There's a unplanned event which has cropped up on 30th Aug 2013, so will have reschedule the industrial tour in the 1st Week of September. Probably on the 3rd of Sep, Tuesday.

Kindly let me know and sorry for the inconvenience.

Thanks & Regards

**BHARTI VIDYAPEETH'S COLLEGE OF ENGINEERING FOR  
WOMEN, PUNE**

**ELECTRONICS AND TELECOMMUNICATION DEPARTMENT**

**INDUSTRIAL VISIT REPORT**

Bharti Vidyapeeth's College Of Engineering For Women's had organized an industrial visit to GMRT on 1<sup>st</sup> March 2014 for T.E. (E&TC). The visit was both informative and motivating. Here the detailed report of the visit been included.

**1<sup>st</sup> March 2014**

On 1st March 2014 T.E.E&TC visited GMRT which is situated near Narayangoan .

The National Centre for Radio Astrophysics (NCRA) of the Tata Institute of Fundamental Research (TIFR) has an active research program in many areas of Astronomy and Astrophysics, which includes studies of the Sun, interplanetary scintillations, pulsars, the Interstellar medium, galaxies and cosmology.

Giant Meter-wave Radio Telescope (GMRT) is located approximately 80 km north of Pune, India and is the largest Radio Telescope operating at low radio frequencies.

The total number of students who were the part of the visit was 75. We reached the venue around 12.00 a.m. Our visit started with a presentation on 7 wonders of Solar System. We were very fortunate to get an opportunity to visit GMRT during the science week. Occasion being science day various informative exhibitions were arranged by the organization. This helped us to get detailed information & working of each block of antennas used.

GMRT consist of 30 fully steerable gigantic parabolic dishes of 45m diameter is spread over distances of up to 25km. The meter wavelength part of the radio spectrum has been particularly chosen for study with GMRT because manmade radio interference is considerably lower in this part of spectrum in India.

The number and configuration of the dishes was optimized to meet the principal astrophysical objectives. Fourteen of thirty dishes are located more or less randomly in a compact central array in a region of about 1 sq km. the remaining 16 dishes are spread out along the 3 arms of an approximately 'Y'-shaped configuration over a much larger region of about 25km. The multiplication or correlation of radio signals from all the antennas enables the radio images of celestial objects to be synthesized with a resolution equivalent to that obtainable with a single gigantic dish 25km in diameter. The array operates in frequency between 50Hz-1420MHz. The highest angular resolution achievable will range from about 60arcsec at the lowest frequencies to about 2arcsec at 1.4 GHz.

The dish has been made light-weight by replacing the conventional back-up structure by mesh and rope trusses. A light-weight thin wire mesh with grid size varying from 10 X 10 mm in the central part of the dish to 20 X 20 mm in outer parts, forms the reflecting surface of the dish. This cuts down the wind forces by a large factor. The weight of the dish is about 80tonnes and can be rotated upto 270degrees clockwise as well as counter clockwise with elevation angle ranging between 15degrees to 110degrees.

Also various innovative and interesting demonstrations were showed related to antennas and other astrophysics topics.

## **INA BEARING COMPANY**

INA Bearings India Pvt. Ltd. was incorporated in 1998 with its first office in Pune, on 24<sup>th</sup> March 2001. Since then the company's mission is to establish a manufacturing base to cater the growing high quality segment of the Indian automotive & two wheeler industry and to provide application/product support to various industry sectors. INA India's headquarters are located in Pune, Maharashtra, India. The company is located at Talegaon Industrial & Floriculture Park, village Ambe,Navlakh Umbre, Taluka Maval, Pune 410 507.

With its three strong brands – INA, FAG, and LuK – the Schaeffler Group is active in the automotive, industrial, and aerospace sectors. There are also other companies and brands in the Schaeffler Group alliance which prioritize innovation, creativity and constant customer focus. . Schaeffler with its brands INA, LuK, and FAG is one of the sector's technological leaders in the areas of cold-forming technology, forging technology, machining, heat treatment, coating technology, and assembly.

INA India specializes in rolling bearings and precision parts of wide range of applications in the automotive industry, motorcycles, precision equipment, machine tools and material handling, to name a few.

### **AUTOMOTIVE DIVISION:**

Schaeffler Engineering GmbH develops and supplies innovative, complete solutions for vehicle powertrains. The company's portfolio includes the development and integration of mechatronic systems from prototype through to production as well as complete vehicle and component acoustics. The automotive aftermarket activities of the Schaeffler Group are concentrated in Schaeffler Automotive Aftermarket. Customized system solutions for repairs shops such as RepXpert as well as services for automotive distributors round out the product line.

INA India has a comprehensive range of bearings for numerous applications in two wheelers which meets a broad engineering spectrum of technical and commercial demands. The product range includes rocker arm, cam rollers,drawn up needle roller bearings, clutch release bearings, one way clutch, transmission cages of steel/plastic/welded technology etc.

## Production

Schaeffler with its brands INA, LuK, and FAG has an extraordinarily broad wealth of expertise and all modern technologies needed to achieve the highest levels of economy and precision in manufacturing. This ranges from the high-volume production that predominantly takes place in the Automotive division through to project-based business in Industrial and Aerospace.

In more than 70 plants across the globe, they manufacture high-precision products every day, ranging from 2 mm drawn cup needle roller bearings right through to large rolling bearings with diameters measuring 4.25 meters

Deep drawing is a cold-forming process, is among INA and FAG's core technologies. All operations that are relevant to quality, e.g. the grinding and honing (ultrafine grinding) of the inner and outer rings of rolling bearings, are carried out in-house. INA has a range of assembly facilities at their disposal - from lean, flexible Chaku-Chaku lines through to highly complex, fully automated production lines - to suit the requirements of the product and the market. This allows to ensure the consistently high quality standard of products. All stages in the manufacture of every single bearing here are documented and archived.

## **Products & Services**

Schaeffler develops and produces high-quality rolling bearings, spherical plain bearings, plain bearings and linear products under the product brands INA and FAG worldwide. Applications in more than 60 industrial sectors and a large number of automotive applications are covered by approx. 40,000 volume-produced catalog products. The range of maintenance products covers the following areas: Mounting and dismantling, lubrication, alignment, condition monitoring.

Support, product development, service and sales are fully linked in all stages of the product cycle. Selection of a suitable lubricant is also part of the comprehensive consultation service. Schaeffler has developed its own range of Arcanol rolling bearing greases comprising a large number of different lubricants.

## **Rolling and Plain Bearings**

Bearings for rotary motion are designed as rolling bearings or plain bearings. A distinction is drawn as to whether the forces occurring between the parts movable relative to each other are transmitted by rolling or sliding elements.

**Rolling bearings:** Rolling bearings generally comprise two bearing rings with integral raceways. Rolling elements are arranged between the rings and roll on the raceways. Rolling elements can be balls, cylindrical rollers, needle rollers, tapered rollers or barrel rollers. The rolling elements are generally guided by a cage that keeps them at a uniform distance from each other and prevents them coming into contact with each other. In needle roller bearings and ribless spherical roller bearings, the cage also ensures that the rolling element axis is positioned correctly. Where bearings can be dismantled, the cage holds the rolling elements together and gives easier fitting of the bearings. For particular applications, rolling bearings with a full complement of balls, cylindrical rollers or needle rollers may be used. The standard material for sheet metal cages is steel, while brass is also used for some applications. Solid cages are made from brass, steel, laminated fabric and other materials. Cages made from thermoplastic materials are also widely used, especially those made from polyamide reinforced

by glass fiber. Rings and rolling elements are predominantly made from through hardened chromium steel, although case hardening steel is also used. Special bearings for extreme operating conditions – load, speed, temperature, corrosion – are made from temperature-resistant and/or corrosion-resistant steels, plastic, ceramics or other materials

Rolling bearings are available in open versions or with seals on one or both sides. The most common types of seals are gap seals and lip seals. In addition to load and speed, attention must also normally be paid to influences such as temperature, lubrication, vibrations, fitting, maintenance etc. Rolling bearings for predominantly radial loads are described as radial bearings. Most radial bearings can support combined loads, e.g. deep groove ball bearings, angular contact ball bearings, tapered roller bearings or spherical roller bearings. Cylindrical roller bearings N, NU, most needle roller bearings, drawn cup needle roller bearings and needle roller and cage assemblies can only support radial loads.

Rolling bearings for predominantly axial loads are described as axial bearings. Axial spherical roller bearings and single direction axial angular contact ball bearings can support combined axial and radial loads. The bearing size is determined primarily by the magnitude and type of load – dynamic or static – the bearing load carrying capacity and the requirements for operating life and operational reliability of the bearing arrangement. Rotating bearings are subjected to dynamic stresses.

### **Plain bearings:**

The function of plain bearing arrangements, like rolling bearing arrangements, is to support or guide parts that are movable relative to each other. They must support and transmit the forces occurring in this case. Whereas the bearing arrangement elements in rolling bearing arrangements are separated from each other by means of rolling parts - rolling elements - the movable component in plain bearing arrangements - normally a shaft, stud or strip - slides on the sliding surface of a static bearing bush, bearing cup or sliding strip. The sliding motion occurs directly between the sliding layer of the bearing body and the part that is supported. Lubrication is ensured by embedded lubricants or a solid layer applied to a supporting body. In

radial motion, the clearance between the shaft and sliding layer ensures the mobility of the sliding partners.

Plain bearings are available as radial bearings, axial bearings, strips, cups and in many other designs. They run quietly and are particularly suitable where high loads must be supported under relatively slow rotary and swivel motion and at low and high temperatures. Due to their versatile specific characteristics, they are therefore used in almost all areas of industry and especially where the space available for the bearing arrangement is very limited.

Extremely high demands are made on bearing arrangements in Industrial applications. Such requirements are enough to consider INA bearings. Wherever state-of-art machine tools carry out milling, drilling, turning, grinding or forming processes and where tools are positioned with razor sharp accuracy, a vital contribution to ensuring quality and precision is made by INA components.

Dear Sir/ Madam,

Greetings!

We take immense pleasure in informing you that "Faculty Orientation Workshop on TE (E&TC/Elex) Revised Syllabus 2012 Course" is being organized under the aegis of Board of Studies Electronics, University of Pune for the subject "**Digital Communication**" in MES College of Engineering, Pune during 12/06/2014 to 14/06/2014.

The objective of this workshop is to orient all the faculty towards the revised syllabus of TE (E&TC/Elex) and to bring in uniformity in teaching across all the colleges under the University of Pune.

We would indeed be obliged if you can kindly consent and deliver an expert lecture on Unit III of above stated subject on 13/06/2014 at our institute.

Looking forward to your kind confirmation.

Thank You.

With Warm Regards.

Sub: Request to deliver an expert lecture at the "Faculty Orientation Workshop on TE Revised Syllabus 2012 Course" under aegis of Board of Studies Electronics, Savitribai Phule Pune University .

Dear Madam,

Greetings!

We take immense pleasure in informing you that "Faculty Orientation Workshop on TE (E&TC/Elex) Revised Syllabus 2012 Course" is being organized under the aegis of Board of Studies Electronics, Savitribai Phule Pune University for the ITCT subject at Cummins College of Engineering for Women during 11<sup>th</sup> to 13<sup>th</sup> Dec, 2014.

The objective of this workshop is to orient all the faculty towards the revised syllabus of TE (E&TC/Elex) and to bring in uniformity in teaching across all the colleges under the University of Pune. Entire syllabus will be covered by expert teachers in concerned subjects.

We would indeed be obliged if you can kindly consent and deliver an expert lecture on Unit IV BCH & RS Codes on 12.12.2014 , Session I between 1.00 AM and 04.15PM of 3Hrs , at our institute.

Looking forward to your kind confirmation.

Thank You,

  
Prof. Sharada Ohatkar  
Co-ordinator, E&TC Dept.  
CCOEW, Pune.

  
Dr. Prachi Mukherji  
Head, E&TC Dept.

## Industrial Visit

21 February 2015 at 13:55

Shaji Menon <shaji.menon@jsw.in>

To: Rameez Shamalik <shamalik1@gmail.com>

Dear Mr. Rameez,

Further to our discussion on the subject, we are pleased to give permission for an Industrial Visit to the TE engineering (E&TC) students of Bharati Vidyapeeth's College of Engineering for Women, Pune. Would request to note down following guidelines and adhere to the same.

1. Date of visit - 24.02.2015, Time: 11.00am to 01.00pm.
2. Number of students + faculty members shall be 110, maximum.
3. The team has to report to our main gate latest by 10.30am, then only we will be able to conduct the plant visit, that too only to limited areas and in groups of 25.
4. As you understand the team size is too large, adherence to reporting time is very essential.
- ✓ 5. All your students have to wear shoes which is very compulsory for plant visit and wearing of formal clothes shall be appreciated.
6. All your students has to be maximum safety conscious and the entire visit shall be at the cost and risk of Bharati Vidyapeeth's College of Engineering for Women, Pune.

Kindly have a confirmation to along with a list of students who will be part of the visiting team.

Regards,

Shaji Menon

Sub : Regarding Industrial Visit

Respected Sir,

This is to inform you that TE(Computer) is willing to go for Industrial Visit to 'Reliance Co', Nagatham Glibag. The permission from the company is taken which is dated on 14th Mar, 2015 (Saturday).

Therefore, I request you to please grant us permission for the same.

This industrial visit will help the students in many ways. Some of the objectives are as follows:-

- (i) Leakage detection system which is automated
- (ii) Database management in production dept
- (iii) Networking within various machines.

Yours sincerely  
Hugale.

Permission for Industrial Visit for Third Year Students of Computer...(2)

surendra.b.patil@ril.com

Today at 2:49 AM

To me

Dear Sir,

We are in receipt of your Mail for the Industrial Visit Bharati Vidyapeeth's College of Engineering for Women Pune in computer engineering Dept. would like to visit RIL,NMD on, 14th March 2015

We are happy to inform you that the students can Visit at ,NMD on same date and time. Our being a petrochemical Industry there are some stringent rules & regulation. They will remain in a group and not stray anywhere.

We need to know the names of the Students with age. & discipline wise. if you need direction please let me know.

Now we expect to receive your itinerary as early as possible with details like arrival time/Departure time/date.

Please inform to us name & mobile no. of the Institute coordinator.

Regards

Surendra Patil

SITS / OFF/ 2014-15/1424

Date : 20<sup>th</sup> March 2015

To,

Dr. S.R. Patil

Head E&TC

BWCOE

Pune - 410507

**Subject: Invitation as a Judge at SITS, Narhe on 27<sup>th</sup> March 2015**

Dear Sir / Madam,

"Sinhgad Technical Education Society", is the conspicuous name in the field of Education. The society was established by Honourable Founder President Prof.M.N.Navale in year 1993. The aim of the Society is to impart quality education from KG to PhD in every stream of education. The Sincere & rigid efforts of Honourable Founder President, the Society is running more than 85 Educational Institutes in Pune and other areas of Maharashtra. The total students learning under the wings of Sinhgad are more than 70,000

Sinhgad Institute of Technology and Science, Narhe was established in year 2008. The Institute is approved by AICTE, DTE, Mumbai & affiliated to University of Pune. In the first year of establishment, the Institute was ranked at 11<sup>th</sup> position in University of Pune First Year Engineering Results. We have state-of-art laboratories, highly qualified & well experienced faculties. We offer five under graduate and three Post graduate courses.

We are highly obliged to invite you as a Judge for Project Competition at our Campus on 27<sup>th</sup> March 2015 between 10 am to 4 pm. Your extensive practical experiences will help the students to get a path to move towards and your suggestion will motivate them as a whole and it will be our great pleasure to have a personality like you for this occasion.

We would be highly obliged if you kindly give your consent to grace the occasion and guide our students.

With warm regards,

  
(Upasani D.E.)  
Head E&TC

To,

Dr. Suvarna Patil,

Dear Madam,

We would like to place on record our sincere gratitude for having accepted our invitation on behalf of Department of Electronics and Telecommunication and delivering an informative talk on “Basics and applications of Digital Communication” for our TE E&TC students. The talk has really created awareness and will surely help our students in making informed choices

We look forward to more such interactions in the future. We thank you for spending your valuable time with us and our students.

Thanking you.

## MEMORANDUM OF UNDERSTANDING

This MEMORANDUM OF UNDERSTANDING between **Purple Squirrel Eduventures (PSQ)**, having their registered office at B-205, second floor, B wing, Supreme Business Park, Powai and **Bharati Vidyapeeth's College of Engineering for Women (BVCOEW)** henceforth) on 20th July, 2015 is to establish that both parties are willing to enter into an agreement to avail Purple Squirrel Eduventures' services.

### TERMS OF AGREEMENT

#### **1. PROGRAM DETAILS**

Customised experiential learning programs will be designed by our experts for **BVCOEW** in best interest of its students, as mutually agreed by both the parties. As per current understanding, we are going to conduct a program that will comprise of industrial visits.

#### **2. SERVICE LEVELS AND CUSTOMER SATISFACTION**

PSQ shall perform the services (of 1) at the same level and with at least the same degree of accuracy, quality, completeness, timeliness, responsiveness, security and efficiency as agreed upon in the applicable work order.

#### **3. SAFETY AND SECURITY**

- PSQ shall ensure the Eduventure is safe and hassle free for students and faculty of **BVCOEW**.
- PSQ shall manage tour managers and directors to ensure proper management and conduct during the eduventure
- **BVCOEW** shall appoint one POC for the purpose of communication with PSQ
- PSQ shall arrange to send timely SMS and emails for the purpose of informing and coordination with students

#### **4. SCOPE OF THE PROGRAM**

The final program includes the following:

- **Eduventures**  
Industry interactions include company visits, and / or speaker sessions and workshops. Final schedule for industrial visits and workshops will be provided once confirmation has been received from colleges and companies
- **Transport & Entrance Fees**  
Comfortable inter-city and intra-city transport is facilitated by us including entrance and guide fees to all places mentioned in the itinerary (unless otherwise stated)
- **Food**  
Meals (snacks/lunch) will be provided by PSQ. Mineral water bottles will be made readily available as well.
- **Miscellaneous**
  - Details of all participating students to be submitted 20 working days prior to the commencement of the programme
  - Travel Insurance of Rs. 3,00,000 per student
  - One faculty member complimentary for every 25 students travelling. Only one faculty member complimentary for less than 50 students on board.

**5. Standard Payment Policy**

- Students are advised to register and pay the entire amount of transaction value at the time of registration, through our online payment portal via Debit Card/ Credit Card/ Net Banking. An auto-generated receipt for the same will be sent to the student immediately upon completion of payment.
- 50 % of the total amount to be paid at the time of confirmation; remaining 50% to be paid within 2 days after the execution of the project.
- Upon failure to adherence of minimum percentage and deadlines of payments, the Industry Visit will be subject to cancellation.
- If the college opts for TDS, only 2% will be permitted u/s 194(c). The certificate for the same should be sent to us at the end of the relevant quarter in which TDS was deducted.

**6. Cancellation Policy**

- Over 30 days prior: 20% of the total amount will be deducted and the rest will be refunded
- 30-15 days prior: 50% of the total amount will be deducted and the rest will be refunded
- 1-15 days prior: No refund will be offered
- If the tour stands cancelled due to force majeure or vis majeure, Purple Squirrel Eduventures shall not be responsible/liable to offer any refund

Sub: Regarding Industrial Visit

Respected Sir,

This is to inform you that TE COMP is willing to go for Industrial visit to STPI [Software Technology Parks of India]. The permission from company is taken which is dated of 23/1/16 (Saturday).

Therefore, I request you to please grant us permission for the same.

This Industrial visit will help the students in many ways. Some of the objectives are as follows:

- a) Learning network communication
- b) Learning about incubation space

~~Mrs. S. D. Kadam~~  
~~8/1/16~~

Yours sincerely  
Hemant  
(Prof. K. Yesugade)

Staff members accompanying students:

- 1) Prof. B.D. Pukale
- 2) Prof. Mrs. P.D. Kale
- 3) Prof. K. Yesugade
- 4) Prof. Mrs. S.B. Jadhav
- 5) Prof. S.A. Deshmukh

Dear Sir, Greetings from Bharati Vidyapeeth's College of Engineering for Wome...

**Sanjay Gupta** <sanjay.gupta@stpi.in>

Jan 13 (F)

to v, sonal, Pranoti, Dayanand, ddpukale, me, Jayashree

Dear Prof Kale,

Its a good idea giving exposure to the students on the practical aspects of what they have been studying at STPI provides ISP services to IT companies along with statutory services for promoting the software expo. You can plan a visit of your students to STPI Hinjawadi Pune where they can visit our NOC. They can also see our incubation space created for start-up companies.

Please let us know visit details in advance so that necessary arrangements can be done.  
regards,

Sanjay Gupta  
Director  
STPI Maharashtra

Special Session - Advances in Signal Processing (ASP)

*Organized By*

**AISSMS- INSTITUTE OF INFORMATION TECHNOLOGY,  
PUNE**

Respected Dr. S. S. Chorage,

On behalf of editorial board, we express our heartfelt gratitude for your timely support and critical technical reviews of papers submitted to IET sponsored EEEECOS-2016 conference (Scopus Indexed) under Special session Track "**Advances in Signal Processing**". Your reviews have been very helpful to authors in improving their papers.

We look forward towards your continual support and a fruitful association.

Thank You,

With Regards,

Dr. V. K. Bairagi,  
Session Coordinator

Sub: Request to deliver an expert lecture at the "Faculty Orientation Workshop on SE Revised Syllabus 2015 Course" under aegis of Board of Studies Electronics, SPPU, Pune

Dear Sir,o

Greetings!

As per telephonic discussion:

We take immense pleasure in informing you that "Faculty Orientation Workshop on SE (E&TC/Elex) Revised Syllabus 2015 Course" is being organized under the aegis of Board of Studies Electronics, SPPU, Pune for all the subjects at various colleges as per the details enclosed herewith, during 09<sup>th</sup> to 11<sup>th</sup> June, 2016.

The objective of this workshop is to orient the entire faculty towards the revised syllabus of SE (E&TC/Elex) and to bring in uniformity in teaching across all the colleges under the University of Pune. Entire syllabus will be covered by expert teachers in concerned subjects.

We would indeed be obliged if you can kindly consent and deliver an expert lecture on Unit III of Signals and Systems on 10.06.2016 in single session of 3 Hrs, at our institute from 09:30 AM to 12.30 PM.

Looking forward for your guidance.

Thank You.

With Warm Regards.

To,

**Subject:** Invitation as **Session Chair** for the Second International Conference on Computing, Communication, Control And Automation ICCUBEA-2016.

Dear Sir,

Heartiest Greetings from Pimpri Chinchwad College of Engineering, (PCCOE) Pune, India.

The PCCOE is affiliated to the Savitribai Phule Pune University, Pune and approved by AICTE, New Delhi. We have got over 3500 students in the campus with excellent academics and research infrastructure, practices and achievements.

We have organized "**Second International Conference on Computing, Communication, Control and Automation (ICCUBEA-2016)**" which is technically sponsored by IEEE, Pune Section to be held on 12<sup>th</sup> – 13<sup>th</sup> Aug. 2016, at PCCOE, Pune, India.

For this conference, around 750 papers were received, out of which 180 papers are selected for the presentation. Along with these paper presentations, expert talks are also organized during this conference.

In this regard, we invite you as a **Session Chair** for the track "**Image Processing & Computer Vision**" on 12<sup>th</sup> August 2016. Looking forward for the positive interaction and participation.

Thanking you.

Sincerely,

Dr. J. S. Umale

Dr. N. B. Chopade

General Chair, ICCUBEA-2016

**Subject: Thanks giving letter.**

Respected Madam,

It was our immense pleasure to invite you for guest lecture at our Institute on **02/09/2016 from 12 to 3 pm** for our B.E. E & TC students for the subject **Microwave Engineering (MWE)**

It was really an interesting session for the students for their development in regards with Microwave Engineering (MWE) exposure. Your experience and expertise in the said subject will definitely help our students to enhance their knowledge. Also our faculty members will be motivated and gain some skills from your expertise. We will be in need your services in near future.

Thanks for sparing your valuable time for the said session.

Thanking you,

Yours faithfully,

Confirmation Email for Industrial Session at I-Medita Networking Labs

Inbox x

Saurabh Rawat <saurabh@imedita.com> 6:51 PM (16 hours ago) to me

Dear Ms. Nilofar,

As discussed on the phone, please treat this email as a Confirmation Email for Industrial Visit session at my-Medita Cisco Networking Labs.

The visit has been fixed for 27<sup>th</sup> and 30<sup>th</sup> September.

Tentative Timing will be 12.30 PM onwards, I'll update you if there are sudden changes in the timings.

Please acknowledge this email.

TSSM/EST/ENGG/USC INTERVIEW/3910 /2016-17

Dates:-27/09/2016

To,

Dr. Patil Sandip Raosaheb

Sub: - Interviews of candidates for the post of **Professor/Associate Professor/Assistant Professor** in TSSM Institutes:-

1. Padmabhooshan Vasantidada Patil Institute of Technology, Baydhan Pune-21.
2. Bhivarabai Sawant College of Engineering & Research, Narhe, Pune-41

Reference: Savitribai Phule Pune University letter No.CCO/1419 dated 26/08/2016 (copy att).

Sir/Madam,

The Management of The Shetkari Shikshan Mandal, Sangli, Pune has arranged interviews of the eligible candidates for the post of **Professor, Associate Professor, Assistant Professor** in TSSM's above Engineering Colleges. As per Savitribai Phule Pune University letter no. CCO/1419 dated 26/08/2016, I kindly request you to act as a Member of the Selection Committee, in your capacity as VC Nominee Subject Expert Nominated By the chair person of governing body for the subject Expert Electronics & Telecommunication.

You are kindly requested to make yourself available and co-operate for the above said purpose. The schedule of the interviews is as follows:-

**Day & Date : 17/10/2016 (Monday)**  
**Time : 10.00 A.M.**  
**Venue : Jayawant Shikshan Prasarak Mandal /**  
**The Shetkari Shikshan Mandal, Pune**  
**(Corporate Office) Katraj Chowk,**  
**Katraj, Pune - 46**  
**Phone No : (020) 24317384/85**

Your kind co-operation in this regard is highly solicited.  
Thanking you,

Yours faithfully,

**Prof. T. J. Sawant**  
President

**EXPERIMENT NO:09**

**TITLE: VISIT to MTSO**

**Date of Performance:**

**CLASS: B.E. (E&TC)**

**Date of Submission:**

**Signature of Staff in-charge with date:**

**VISIT TO MTSO AT  
BHARAT SANCHAR NIGAM LTD.  
(A govt. of INDIA enterprise)**

Visit to MTSO at regional telecom training center at Bharat Sanchar Nigam LTD., at Karvenagar was scheduled on 10<sup>th</sup> -11<sup>th</sup> January, 2017.

A GSM network comprises of many functional units. These functions and interfaces are explained in this chapter. The GSM network can be broadly divided into:

- The Mobile Station (MS)
- The Base Station Subsystem (BSS)
- The Network Switching Subsystem (NSS)
- The Operation Support Subsystem (OSS)

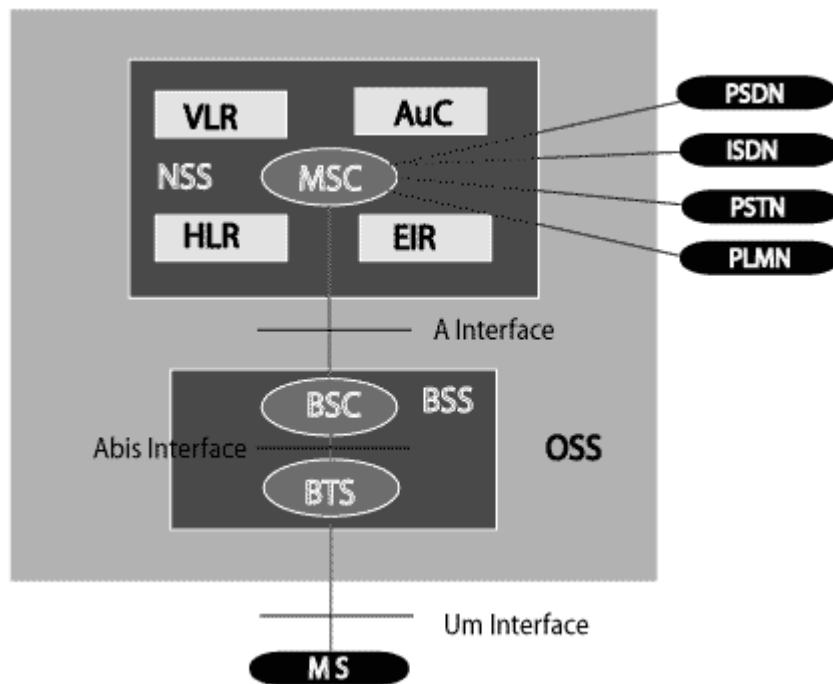

GSM network areas

In a GSM network, the following areas are defined:

- **Cell:** Cell is the basic service area; one BTS covers one cell. Each cell is given a Cell Global Identity (CGI), a number that uniquely identifies the cell.

- **Location Area:** A group of cells form a Location Area (LA). This is the area that is paged when a subscriber gets an incoming call. Each LA is assigned a Location Area Identity (LAI). Each LA is served by one or more BSCs.
- **MSC/VLR Service Area:** The area covered by one MSC is called the MSC/VLR service area.
- **PLMN:** The area covered by one network operator is called the Public Land Mobile Network (PLMN). A PLMN can contain one or more MSCs.

Given below is a simple pictorial view of the GSM architecture.

### Parts of a Telecommunication network

The main parts of a Telecommunication network are:

1. Telephone Exchange
2. Main Distribution Frame (MDF)
3. Switch Room

### TELEPHONE EXCHANGE

Equipment which effects interconnection of telephones is known as switching equipment. The switching centre, which houses the terminating and switching equipment is called telephone exchange. A telephone exchange is a telecommunication system used in the public switched telephone network or in large enterprises. An exchange consists of electronic components that interconnect (switch) telephone subscriber lines or virtual circuits of digital systems to establish telephone calls between subscribers

All telephone subscribers are served by automatic exchanges. Today's automatic exchanges use a pair of computers. One running the program that provides services. Second, monitoring the operation of the first, ready to take over in a few seconds in the event of equipment failure.

Various exchanges present in BSNL are:

1. C-DOT
2. OCB (ORGANE DE COMMANDE B2 VERSION)
- 0 3. EWSD

### **C-DOT**

It work on telecom technology, products and services. Provide solutions for current and future requirements of telecommunication and converged networks including those required for rural application. Provide market orientation to R & D activities and sustain C-DOT as center of excellence.

### **OCB (ORGANE DE COMMANDE B2 VERSION)**

It is a digital switching system. The system supports all the existing signaling system. The system has 'auto recovery' feature. When a serious fault occur in control unit, it gives a message to SMM (operation & maintenance unit)

**OCB(ORGANE DE COMMANDE B2 VERSION)**

### **EWSD**

The EWSD Digital Switching Systems offer a wide range of telephony features and supplementary services. Further capabilities can be developed to meet specific customer needs.

## MAIN DISTRIBUTION FRAME (MDF)

M.D.F. is a media between switching network and subscriber's line. It is a termination point within the local telephone exchange where exchange equipment and terminations of local loops are connected by jumper wires.

### FUNCTIONS OF MDF:

All cable copper wires supplying services through user telephone lines are terminated and distributed through MDF. The most common kind of large MDF is a long steel rack accessible from both sides. Each jumper is a twisted wire. It consists of local connection and broadband connection frames for the main Exchange area. The MDF usually holds central office protective devices including heat coils and functions as a test point between a line and the office. It provides testing of calls. It checks whether fault is indoor or external. All lines terminate individually

### ORGANIZATION OF MDF

- Vertical side
- Horizontal side

**Vertical side Rack:**

On the rack, the tags are situated. One rack is having eight tags. The counting is done from up (0) to down (7).

**Tags:**

Each rack consists of eight tags

1 tag = 4 core

1 core = 4 bunch

1 bunch = 2 line

N.E:-The word NE stands for the 'NUMBER OF EQUIPMENT'. It is used for testing number.

**Wedge:**

Wedge is used as a device for checking the ring. Wedge is placed in jack strips, which is connected to telephone for checking.

**Horizontal side**

The horizontal side connected to the underground cable. This cable is having 100 pairs. These pair are distributed when company allot the telephone number to the subscriber. Horizontal side is again subdivided in two parts: One part is connected with the vertical side. Another with the subscriber line by using 100 pair underground cable.

**POWER PLANT**

As we know that, the power is the main source or any organization. It is the case of E-10B exchange. That is the first requirement of any organization is the input. The main source of this exchange is AC supply.

**The main part of power room are:-**

1. Batteries for providing 48V supply
2. UPS (Uninterruptable Power Supply)
3. Charging - Discharging Unit 4. Inverter and Converter Unit

### **Switch Room**

Fig. switch room

Switch room consists of BM (Benjamin Moore) and CM cabinets mounted in standard switch. These cabinets are fastened to a switch Room and interconnected by cables

### **VARIOUS INTERNET SERVICES LEASED LINES**

The information sent through the leased line travels along dedicated secure channels, eliminating the congestion that occurs in shared networks. between two points set up by a telecommunications carrier. They can be used for telephone, data, or Internet services A leased line (dedicated line) is a permanent Optical Fibre Cable (OFC) or telephone connection. It is commonly used in ATMs. WI-FI (WIRELESS FIDELITY) A Wi-Fi network provides the features and benefits of traditional LAN technologies such as Ethernet and Token Ring without the limitations of wires or cables. WIFI is a wireless LAN Technology to deliver wireless broad band speeds up to 54 Mbps to Laptops, PCs Wi-Fi enabled phones etc.

### **GENERAL PACKET RADIO SERVICE (GPRS)**

General packet radio service (GPRS) is a packet oriented mobile data service available to users of the 2G cellular communication systems, global system for mobile communications (GSM), as well as in the 3G systems. In 2G systems, GPRS provides data rates of 56-114 kbps GPRS extends the GSM circuit switched data capabilities and makes the following services possible:

1. “ Always on” Internet access.
2. Multimedia messaging service (MMS).
3. Push to talk over cellular (PoC/PTT).
4. Point to Point (P2P) service: inter-networking with the internet (IP).
5. Increase message sending speed 30 messages per minute approximately.

### **BSNL Broadband Service**

Broadband refers to a connection that has capacity to transmit large amount of data at high speed. Presently a connection having download speeds of 256 kbps or more is classified as broadband. When connected to the Internet broadband connection allows surfing or downloading much faster than a dial-up or any other narrowband connections. BSNL offers 2 Mbps minimum download speed for its Broadband connections. Requirement for providing Broad Band connection

1. Personal Computer
2. ADSL Modem
3. Land Line Connection
4. Splitter for separating telephone from Personal computer
5. High speed Internet Access: This is the always-on Internet access service with speed ranging from 256 kbps to 8 Mbps.

## Thanking Letter

To

Date: 13/01/2017

The Respected Sir/Madam,

Bharti Vidyapeeth's College of Engineering for Women,

Dhankawadi, Pune, Maharashtra 411043

*Respected Sir*

Thank you for allowing a chance for our company to provide industrial training batch. Today I appreciated for the time you took from your busy schedule. I hope you found our theoretical presentation and practical training about 1 Day **Industrial Satellite Training Program** is best. That could see how our program can be of great value in your academic and future purpose. I will call next time to get your reaction for new program.

Best Regards,

Management Department

To,  
The Executive Engineer,  
Koyna Dam Maintenance Division,  
Koyna Nagar, Satara district,  
Date: 17<sup>th</sup> January, 2017.

Subject: Permission to visit Koyna Dam

Dear Sir,

Greetings from Bharati Vidyapeeth college of engineering for women, Pune. Our second year students wish to visit Koyna dam on 21<sup>st</sup> January 2017. It will be a great learning experience for them if you allow the budding engineers inside the dam to show them the great engineering marvel and the working of various machines.

Kindly allow our 63 students along with 6 staff members to enter the dam and make arrangements for the same.

Thanking You in anticipation.

Yours Truly,

Prof. Dr. H.V. Vankudre

Principal, BVCOEW,

## Report on Industrial Visit to Koyna Dam

"All work and no play makes jack a dull boy." Keeping in mind the apt adage, an Industrial visit was organized for the students of second year of the Electronics and Telecommunication department on the 21<sup>st</sup> of January, 2017. It was arranged for the students to visit the Koyna Hydroelectric Project. As civilians are not allowed to enter the closed perimeter of the Dam vicinity, special permissions were procured for the students to visit the gates and the base power plant from proximity. Prof. R.M. Shamalik and Miss. Akshata Thorawade put in their tireless efforts into getting the required permissions.

The visitors had to cover a distance of approximately 150 kilometers from Pune to the destination, at Koynanagar. An early departure was scheduled in order ensure quick commuting and to gain maximum time for the site exploration. The students were accompanied by staff members, Prof. R.M. Shamalik, Prof K.R. Chaudhari, Prof K.D. Mahajan, Prof Atre and Prof S.M. Patil. The entire group came together at around 7 am near the college entrance. There were buses arranged for travelling to the destination and back.

The buses proceeded on the Mumbai- Pune Bypass road. Next it took to the National Highway 48. Following the national highway, the boarders crossed Saswad, Khandala and Lonand, where they took a right turn onto state highway no 61.

The students were filled with a spirit of enthusiasm and inquisition. Amidst revelry and enjoyment among the students, the long travelling time seemed shorter. A short stoppage was taken for breakfast. Continuing the journey post that, the group arrived at the Koyna Dam entrance around 1:30 pm. The security officers at the entrance of the Dam premises performed a thorough check, keeping up with their high standards of safety and security. The students were allowed to enter the closed perimeter, under surveillance.

On entering the main entrance, it took the group a 5 minutes' walk to reach the gates of the dam. There, the chief officer of the Koyna Hydroelectric Project briefed the students about the details and specifications of the dam parameters.

The dam consists of 6 gates, which are sequentially opened and closed to control the flow of the water. There are sensors provided to measure the depth of water that is collected after each downpour. With a catchment area, that dams the Koyna river and forms the Shivsagar Lake, of approximately 50 km (31 mi) in length, it is one of the largest civil engineering projects commissioned after Indian independence. The Koyna hydro-electric project is run by the Maharashtra State Electricity Board.

Since its erection, the dam has withstood many earthquakes in the recent past, including the devastating 1967 Koynanagar earthquake, resulting in the dam developing some cracks. After the

disaster, grouting of the cracks was done. A special seismograph was also set up, which now provides vital data to the Geological Survey of India. As a step towards prevention of future seismological disturbance, internal holes have been drilled to relieve the hydrostatic pressures in the body of the dam. Indian scientific establishment has formulated an ambitious project to drill a deep borehole in the region and intensely study the earthquake activity.

After close exploration of the gates of the dam and detailed discussion over its functioning and maintenance, the group proceeded to visit the base power station. There, the students were informed about the detailed working of the power plant, and the power generation process. The power plant consisted of three different underground levels. On the third level, there was conversion of potential and kinetic energy. Then, the group was taken to the second level, wherein mechanical energy was being converted into kinetic energy. The lowermost level comprised of the turbine, whose blades were set into motion by the falling water. Here, tidal energy was converted into mechanical energy. The power generated in this power plant is utilized for the irrigation purposes.

Followed by this, the group was taken onto visit the Koyna Park. Here, arrangements for lunch were done. Post lunch, the group went on to explore the scenic beauty of the beautiful park. A media centre and museum is located at the centre of the park. At the media centre, the group saw a screening of a detailed documentary, explaining the planning, construction and working of the extensive Koyna hydroelectric Project. The pleasant weather and exquisite vicinity made the park visit a complete delight.

As the visit came to an end, the group took departure from Koyna nagar at 7:30 pm. The darkness around, and extensive greenery gave way to a cool, soothing night. The visit ended as the group arrived at the College main entrance at 11:50 pm. The students and staff members dispersed, rife with knowledge and an experience of a lifetime.

BWCDE.

**Subject: Thanks Letter for paper/ poster competition, "MIT Persona Fest 2017".**

Dear Sir/Madam,

On behalf of Electronics and Telecommunication Department of **MIT Art, Design and Technology University, Loni Kalbhor, Pune**, we would like to take this opportunity to express our heartfelt thanks for your active involvement as a judge of the "**MIT Persona Fest 2017**".

We sincerely appreciate your efforts in supporting us and providing useful review to our students. We are confident that participants will be highly benefited by your priceless inputs and will appreciate your distinguished presence.

We hope to find more such opportunities in the near future.

Thanking you.

Subject: Approval to visit your esteemed organization.

Respected Sir,

Bharati Vidyapeeth's College of Engineering for Women, Pune is organizing an industrial visit for Final year computer engineering students to your esteemed organization.

As part of the curriculum of final year student's industrial visit is mandatory, so as to provide with them the real insight of working procedure of an esteemed organization such as yours and to fulfill the curriculum demand.

We are very happy to inform you that college has approved a team of 66 (04 faculty + 62 students) in the morning session of 14<sup>th</sup> March 2017 will visit your esteemed organization as per your permission.

Your co-ordination in this regard will not only helpful for curriculum but also strengthen the women empowerment of nation.

With regards.
