..

Good teaching

None

Nil

–

No suggestion

No

No suggestions

All good

Internship opportunity

Shouldn't burden with assignments at one time

Excellent

No,it was good

--

Improvement suggested for students coding practice and strong communication

Provide more practical session's

1. Practical lab should be well equipped
2. Less use of ppt during lectures
3. Syllabus completion before time

1. The quality of education was not hampered due to any of the reasons, be with the pandemic.

2. Fair Importance is given to Assignments and Theory Practicals.
3. Maths Syllabus was not entirely completed. Only the important topics were covered.

Teachers should teach the student more effectively and should make the concept more clear

We need to be informed about the things little earlier whether it may be regarding exams or any other thing.

....

1.Proper division of syllabus wasn't done due to time limit issues nd so that should have been done 2.Did not understand even a word of M3 and so would request to take needful decisions. 3.More illustrative Teaching is needed.

Should more focus on teaching practical knowledge

Try to encourage in study for week subject

Instead of giving assignments students should be made to focus more on improving their skills.

Very nice experience

___

No Suggession

Teaching on board should increase .

Nothing suggestions for improve teaching.

Should cover the syllabus,improved learning and teaching methods

Everything is good

No need to improve the overall teaching is good

Very Nice

Industrial visits are necessary

Utilize variety of technology, provide socialization opportunities

Great

nothing

The current method is good. Where students get proper time for lectures and practical sessions also. Mini project should be given to students on the basis of what they learnt.

Please encourage students to participate in interactive sessions in the classroom.

Syallubus points should be explained in detail

It's excellent always there for mental support and educational support

1. Try to focus on internship opportunities right from second year

Math(M3) teaching must be good, In Practicals computers should be good, And proper guidance for Practicals.

Some such activities should be taken that a particular individual can grow.

It's already good enough.
Sometimes Just need to interact with students unofficially as well for making students comfortable.
As well...we can take more or extra curriculum activities( other than studies)for the betterment of our own skill

No suggestion..

Connect to students individually//Encourage students to share work regularly//Consider new learning methods

Good quality projectors are needed, machines needs to be updated, more student-teacher interaction is needed, all Library facilities should be made available.

Good quality projectors, Machines need to be upgraded, More student teacher interactions, All library facilities should be made available, digital learning

Overall teaching staff is good

Practicals
Learning
Other activities

Improve students activities
Give more notes and time to students
Show interest in students activities

Bad,only 2 staff interact with students ,others just read the PPT and end the syllabus

Good ,few staff don't interact with the students

They use for teaching only ppts

1.Use of videos and ppts while explaining helps a lot to visualize a lot during explanation
2.For practical explanation the basic concepts and what to do makes practical easier
3.Taking continuous feedbacks from students and helping in project activites helps in overall development of student

Teaching speed should be reduced for some teachers

Nope

Want all lectures offline cause online class doesn't help

Teaching is good 👍 thanks for providing us amazing teachers 🖤

They have teach us with their all heart in it

More intrest in students , apart from book knowledge and sharing of good experiences

Give the practical manual at a time when that practical get perform not at one time all

Do the work on time

Nothing any suggestions to improve overall teaching. It's good

1)Make us free for doing extra curricular activities.
2)Hire good teachers for important subjects.
3)Make Saturday a holiday and take lectures within monday to friday.

Keep going

Teaching should be conceptually clear . staff should be supportive.

Good

No all are good for teaching

Excellent

Need to give more explosure towards field industry and also conduct more extracurricular activities.

The last 4 units are not understood because it's teach very fast

Best teaching staff

---

I think overall teaching learning process was carried in a good way just some other concepts from reference book should also be taught for more ideas.

Communicate more

Teacher should give real world example more, teacher should use chalk board to teach numerical

Concepts with real time examples
Practical practice with better understanding concepts.
Mathematical sub needs more practice

Very good

the topics doing to be covered in the class should be told in advance so that we can go throw them before coming into the lecture

Teacher should be teach us on blackboard

Good, Effective

It's good.
